Specific Programme II: Structuring the ERA

Calls open: 17 December 2002

Calls closed: see second table

Instruments, Activities and Objectives within the Marie Curie Program

Instrument	Activity	Objective
Host-driven actions	Research Training Networks	To offer research training within the frame of a collaborative research project
	Early Stage Training	To provide structured scientific / technological training
	Transfer of Knowledge	Development Scheme: To reinforce and develop competencies in research Industry-Academia Scheme: To encourage academia-industry exchange
	Series of Events	To support training of and promote contact building between researchers through series of conferences and training events
	Large conferences	To support attendance of researchers at international events
Individual-driven actions	Intra-European Individual Fellowships	To provide advanced training tailored to the individual needs
	Incoming International Fellowships	To attract top-class researchers from Third Countries to undertake research training in Europe and develop co-operation with Third Countries
	Outgoing International Fellowships	To enable researchers to broaden their international experience by carrying out research in Third Countries with a compulsory return phase
Excellence promotion and recognition	Excellence Grants	To provide support for the creation and development of European research teams led by researchers with potential to reach high levels of excellence
	Excellence Awards	To give public recognition to excellence achieved by researchers who have in the past benefited from training and mobility support by EC
	Chairs	To support world-class researchers for a period of research and training, encouraging them to resume or further develop their careers in Europe
Return and reintegration mechanisms	European Reintegration grants	To support the reintegration of researchers into professional scientific careers after benefiting from a Marie Curie Action
	International reintegration grants	To attract European researchers who are carrying out research outside Europe to return and transfer the knowledge they have acquired.
